

10 SIH PPT

SIH PPT Content Plan

A 16-slide narrative that stays aligned with the product requirements and live demonstration.

Recommended slide sequence

#	Slide	Required message
1	Title	TRINETRA, PS 26206, team
2	Problem	Validated users and problem
3	Existing challenges	Evidence-backed gaps
4	Solution	TRINETRA operating flow
5	Users	Citizen, authority, responder
6	Core features	Committed MVP only
7	Workflow	End-to-end user and response flow
8	Architecture	Components and integrations
9	AI/ML	Bounded use case, evidence, limits
10	GIS	Layers, formats, provenance, freshness
11	Innovation	Defensible differentiation
12	Impact	Outcome chain; no invented statistics
13	MVP	Scope, status, dependencies, readiness
14	Future scope	Clearly uncommitted roadmap
15	Demo	Scenario and live transition
16	Conclusion	Problem, solution, demonstrated value

Presentation rules

- One central message per slide.
- Use verified research for problem, challenge, innovation, and impact claims.
- Use implemented screenshots and real architecture details in the final version.
- Separate committed MVP from future scope visually and verbally.
- Make the workflow and demo tell the same story.
- Assign speakers and rehearse handoffs.

Core narrative

Problem → localized operational gap → TRINETRA solution → user workflow → architecture → bounded AI/GIS
→ demonstrated MVP → credible future scope.
