

11 DEMO SCRIPT

Demo Script

A reliable, presenter-owned walkthrough of TRINETRA's complete two-way disaster-response loop.

Demo objective

Demonstrate one coherent loop: detect/collect → assess → inform → locate → respond → report.

Step	Screen / action	Narration result	Lead
1	Open TRINETRA dashboard	Introduce the chosen disaster scenario and current situation.	Ayush
2	Open disaster map	Show affected area, disaster location, layers, and provenance.	Rahul
3	Citizen submits report	Enter type, location, description, and optional image; show confirmation.	Abhinav
4	Authority opens report	Show the citizen-to-authority handoff and triage status.	Abhinav
5	Review risk assessment	Explain available inputs, advisory output, limitations, and fallback.	Prinshu
6	Publish alert	Create a current alert with area, severity, validity, and instructions.	Ayush
7	Citizen receives alert	Show the authority-to-citizen return path.	Ayush
8	Locate safe zone/resource	Find a safe zone, hospital, shelter, or relief center.	Rahul
9	Close	Summarize the demonstrated end-to-end value.	Raghav

Rehearsal checklist

- Fixed scenario, seed data, and test accounts
- Reset procedure tested before every run
- Timed narration and presenter handoffs
- Map, model, network, and deployment failure branches
- Fallback screenshots or recording
- No unsupported model, impact, or data-source claims
- Every visible status and alert has clear provenance

Presenter recovery line

If a live dependency fails: "TRINETRA detects the unavailable service, labels the data state, and switches to the approved demonstration fixture so the operational flow remains visible without pretending the data is live."

Ayush's product-coordination sequence

01 Understand SIH PS 26206

	↓
02	Identify users and concrete problems
	↓
03	Define TRINETRA and core features
	↓
04	Separate MVP from advanced scope
	↓
05	Specify user flows and functional requirements
	↓
06	Define API/data requirements
	↓
07	Coordinate development handoffs
	↓
08	Integrate and test
	↓
09	Finalize SIH documentation
	↓
10	Rehearse PPT and demo
